Vol. 6 No. 6 | PURDUE UNIVERSITY CALUMET CENTER, HAMMOND, INDIANA | Friday, February 27, 1959

VALENTINE DANCE SWINGS

Cupid Arrives Early

By JIM KOKENIS

Screeeech, slam, help her out, salm—made it! Where? To the St. Valentine's Dance of course.

The student council sponsored its only combo dance, other than the traditional two semi-formals, Saturday, February 7, 1959. Dancing, musical notes provided by the Dukes, a five piece combo. Some of you may have recognized the accordionist and drummer as perhaps being students at P.U.C.C. You're right, they were none other than Kemosabe Bob Trgovich and his Indian sidekick, Kevin "Tonto" McCarthy.

Swinging rhythym and nostalgic music were intermittently played throughuot the evening. One has to laugh when he hears Kemosabe Trgovich explain that people should not do the "Bunny Hop" to "Ray Anthony's Boogie."

Young couples and "stags" danced in a flood of blue lights and a red and white decorating scheme. Strips of alternating red and white crepe paper were hung from wire strung around the lounge. Twisted red and white streamers adorned both pillars lengthwise.

Perhaps the student council is becoming social-conscious, for they offered a new drink for refreshments instead of that bottled fruit punch. Their new concoction, orange sherbet bathed in orange ade, made a hit with everyone—in fact someone had to go out and buy more drinking cups to keep the drinking crowd happy.

It was quite safe to say that everyone had had a wonderful time as Chet Stettin's trumpet with a soul played "Stardust" to end a wonderful evening of dancing fun.

P.S. Perhaps some of you noticed the Heart Fund display and gave graciously; if you did, thank you. The contributions amounted to $3.14.

Heartbeat

"For every heart you love, help your Heart Fund." This is the slogan of the Heart Association. It means that the Heart Association must have the necessary funds to support research into all forms of heart and blood disease, to bring local doctors the latest research information to prevent rheumatic fever, and to assist in the rehabilitation of heart disease victims. The Pi Sigma Kappa girls were happy to have a small part in soliciting funds from the faculty to help the Heart Association carry on its fight against heart diseases.

PSK would like to thank all the members of the faculty who contributed so generously to the Heart Fund.

Pi Sigma Kappa Starts Activities

The minority group at P.U.C.C. has finally organized. Be prepared as the gals from the Casino get into the full swing of the activities here at the Center. One of the Pi Sigma Kappa's main purposes is to promote the collegiate atmosphere and activities on our Calumet Region campus. To fulfill this purpose the club has established three standing committees to help the officers and members. There is a Social Commitee, headed by Zona Butler. This committee's job is the planning of scial activities for both club and general student patronage. Miss Butler has Leslie Thomas, Janet Galen, and Faye Karras to help her. Another of the committees is the Ways and Means Committee, headed by Judy Cavanaugh. This committee, of course, devises ways for the Pi Sigma Kappa's to gain money for worthwhile causes both inside and outside the University's walls. Miss Cavanaugh thus far has Marlene Mayercik to help her. The last of the standing committees is the Public Relations Committee headed by Jackie Bruno. This committee's job is to inform the members of the organization, the students and faculty of P.U.C.C. and the general public of the club's social activities. The other members of this committee are Eleanor Puoci, Harriet Peller, and Doris Davis.

At the first meeting of the new semester the officers, Jackie Tolle (president), Doris Gettig (vice-president), and Virginia Chizmar (secretary), introduced themselves to the new members who in turn introduced themselves to the other members. The old members then introduced themselves. The first order of business carried out was the election of a new treasurer to take the place of Miss Nemeth, who went to the down-state campus. The new treasurer is Eleanor Puoci.

Before the organization was officially formed, the girls participated in the Christmas Sing and made the programs for the annual Winter Wonderland formal. As a recognized girls' club, the girls held an auction in the student lounge on February 20, and are planning a dance for the fourth of April.

If there are any girls interested in joining the Pi Sigma Kappa's, all they need do is contact any of the officers or girls for this information.

ROCK'A'CONGA

John Tataren, Helen Vasilas, Bob Trgovich, Betty Smith and Kevin McCarthy rock'a'congaing around the lounge at the recent juke box dance. Besides the Conga Line, Cha Chas, Bops and Waltzes at the dance one could push the buttons on the juke box and drink punch. Those who attended the dance enjoyed it very much and the Student Council plans on another of this type in the future.

CRA-AZY, MAN

All the cool cats who attended the Valentine Dance flipped over the wild music of the Dukes. (L. to R.) Bob Trgovich, Mike Goodman, Chet Stettin, Dennis Hittle and Kevin McCarthy are the swingin' jivers in the group. Bob and Kevin are students on the Calumet Campus and also are members of the Boilermaker staff. Anyone in need of a hep combo which is way in can contact one of the boys.

PURDUE CALUMET CENTER IS ON THE AIR

The day is Friday. The time is approximately 11:50 a.m. Listen closely, for the next few minutes will bring news and views from Purdue Calumet Center.

Each morning, on radio station WJOB, is Harmony Home. This show, with Jerry Mitchell as emcee and disc jockey, runs from 9 until noon Monday through Friday. On Fridays, Jerry turns the "mike" over to Walter Pehlen from Purdue for a few minutes of commentary on the activities, registration, new classes, etc., that concern either Purdue Calumet or Hammnd.

The news from Purdue is a public service feature of WJOB and is sponsored jointly with the Boilermaker.

Remember, that's Friday, 11:50 a.m., radio station WJOB (1230 on your dial).

P.U.C.C. Students To Sing With Glee Club

Friday, March 6, is the big day for all of the boys in P.M.O. (Purdue Musical Organization); they have been invited to sing "The Battle Hymn of the Republic" with the famed Purdue Men's Choir, directed by Al Stewart, at the Hammond Civic Center.

Preparing for the appearance has been one of the projects of P.M.O. at the Calumet Center. Aside from this preparation the members of P.M.O. have just been enjoying themselves through their singing.

There is no need to worry if you have never had any previous experience in singing; it is not necessary in order to join P.M.O.

Student Assembly Held

Reecntly an all-student convocation was held, during which the student activities were discussed and suggestions were asked for from the general student body.

The attached suggestions have been offered to me by some of the students. It is reproduced here by verbatim. Your comments will be appreciated.

1. A pay juke box for the lounge.
2. A mixed bowling league, not a tournament.
3. Intramural sports: Basketball, Volleyball, Softball, Tennis.
4. Find an empty room and buy several ping-pong tables and rackets for recreation during class breaks. (Student's should bring their own ping pong balls.)
5. Electronics Club.
6. Creative Art Club.
7. Don't post lists on the bulletin board which require signatures.
8. We prefer records for dances rather than live music. (Cheaper, too.)
9. Gve the lounge a college-like atmosphere. Suggestions: a large photo or photos of the Purdue Campus, characterizations of typical college life (football player, English prof., fraternity life, 600 man, a large Purdue banner, etc.)
10. Make activities the object of the Boilermaker. Create the interest if it isn't already there. Play it up big.

In closing, we feel that P.U.C.C. needs activities and a change in attitude (brought about by these activities) in order to make the extension a small college and to get the students' center of interest switched to the extension as their interest was in high school activities prior to graduation.

Son of Instructor Wins Science Honors

Peter Bock, son of Mr. Frederick Bock, who teaches mechanical engineering in the College and Technical Institute, was recently named in the honor awards group of the Westinghouse Science Talent Search. Young Bock was honored for his work in developing an electronic device t o measure liquid levels by radio transmission. In application, this device could be used to determine the level of a liquid in a storage tank.

Forty students selected from the honors group will be awarded an all-expense trip to Washington, D.C., where they will attend the five-day Science Talent Institute. At the Institute they will compete for national scholarships and other awards.

WORK BEGINS ON SPRING SEMI-FORMAL

Well, here we go again. Maybe you have noticed the council members running around like crazy lately, the notices for meetings that are hanging on the board in the lounge, the little groups standing in the halls with everyone talking at once and, over all this, a somewhat subdued feeling of excitement. If you've wondered what caused all of this, the answer is of course the Spring Semi-Formal. All of you know how much work and preparation went into the Christmas dance, and believe me the spring dance is going to take twice as much time, work, brains and ingenuity.

The dance is going to be thrown in the Armory this spring for the first time in a number of years, and the amount of decorating that must be done is enormous. The committees have been formed and are starting to line up and recruit all the material and help they can get. We'll need everyone's help on this one because it will be really big.

Everyone is going to want tickets to this one and it is suggested you get them early and avoid the last minute rush. By doing this you will insure yourself of a ticket to the best dance P.U.C.C. has ever thrown. In addition anyone interested in helping with the dance preparations can contact any council member. The last thing of importance is of course the date, April 18, and the time 8:30-12:00. Be seeing you there.

—FLASH—

SALE—Overstocked—SALE

We, the members of the Boilermaker staff, find that we are overstocked with pictures that were published in the past editions of the paper. We also have some pictures that were not published for certain reasons known to all. The pictures have been slowly stacking up in a pile in room 5, and we now find that we have more pictures than we know what to do with. The pictures are now lying around collecting dust and we find that the pictures should not go to waste; therefore the Boilermaker is going to sell the pictures to students who would like them. They will be sold for 50c each. The pictures are 5"x7" in size although there are some smaller sizes and larger sizes.

There are some pictures that certain people don't know about and would do anything to obtain, but to make it fair for all students we must say that "first come first served." So come in to room 5 or contact any Boilermaker staff member if you wish a picture or a number of pictures. Remember that's 50c for a 5" x 7" or larger picture. So come on in and look over the selection.

The proceeds will be used for purchases of future photographic needs.

Sorry we do not give S & H, Gold Bell, King Corn or Purple Martin Trading Stamps, but we do have a lot of used postage stamps.

No Editorial

Your editors this month have succumbed to the apathy of the student body and thus: no editorial.

Because of our heavy class schedules, long hours of employment in the local "factories" (places of employment) we, too, found no available time for creative writing for the **Boilermaker.**

Right now we are contemplating joining in as third and fourth for a pinochle game. After all, if our reporters can do so, as the saying goes, "If you can't beat 'em, join 'em." It's not only the Boilermaker staff but 90% of the student body. Who are we to deprive the student 'blob' (body) of their only apparent means of recreation and enjoyment? That is besides two hours for coffee and little chats with our friends. And of course, we want to do our part in messing up the lounge. We might be mistaken, someone might be sneaking in and messing up the lounge, but we doubt it.

Then there are those who seem to derive great pleasure just watching these momentous card games. If any of the females have a hand in the game, there are at least three Romeos gathered about helping each girl make each climactic decision. Of course we are not inferring that their sense of values is slightly warped, but . . . any red-blooded male certainly couldn't pass up such an opportunity to watch these activities.

There are even a few professors here at the Center who are so out of it they object when their students ditch class to watch Mickey Mouse Club, John's Other Wife, or Queen For A Day. Our efficient engineers just couldn't let all that untapped electricity go to waste.

It wouldn't be right if we came to the tame school activities and joined our pansy cohorts. Who wants to come to a crummy ole school dance and see a lousy basketball game? Who wants to waste his valuable time? Just because there are a few foolish individuals who waste time planning and executing these activities doesn't mean that we should support them.

Speaking of activities, there are a few off-key altos, sopranos, tenors and bases who seem to think they can sing. They have formed some sort of a group called **PMO.** And they're only going to sing with the **Purdue Glee Club,** March 6, in the Civic Center.

If we may offer a suggestion for the improvement of our Center, why not build pop bottle racks and ash trays into the floor? In this way a button could be pushed and all the assorted garbage could be swallowed up into the floor regularly.

At any rate, your editors are off to join you in the Pit, commonly called the lounge. We are in need of our elbow exercise at the card tables. See you.

K.A.R. & W.J.P.

Purdue Personalities . . . .

By BUNNY

Wanted For Personality Of The Month

CARMA GREGORY

NAME: CARMA GREGORY.

DESCRIPTION: Black hair and brown eyes, 5'5" tall, 115 pounds, 18 years old.

BACKGROUND: Born on the south side of Chicago; family now resides in Hammond. Subject attended Amundsen High School, where she was a member of the National Honor Society, a member of the Student Body and Class Soloist.

IDENTIFYING TRAITS: May be found at Pizza Parlors or Steak Houses, classical music concerts, ballets, or at a painter's easel. Subject is very sociable and may be found in groups of animated people, holding lively discussions on nearly any subject. She would fit in with, and be a welcome addition to, such organizations as the Student Council, The Calumet Boilermaker, or P.M.O.

This person prefers dinner and a movie in the company of tall, good looking, musically inclined men, rather than staying in hiding, and may also be tempted to attend dances, which she enjoys very much.

The Boilermaker is eager to apprehend this person, and place her name on its masthead. Anyone who gives the staff a clue as how this may be accomplished will receive the reward of the staff's gratitude.

WARNING!! This girl is witty and intelligent, as well as charming. All men are reminded that this combination in a woman is generally fatal to bachelors, and are urged to be on their guard.

BOB WAKEFIELD

Wanted For Personality Of The Month

NAME: BOB WAKEFIELD.

DESCRIPTION: Brown hair and brown eyes, 5'11" tall, 165 pounds, 18½ years old.

BACKGROUND: Born in Rensselaer, Indiana; moved to Highland in 1941. Subject attended Griffith High School, where he was a Student Council member, Vice-President of the Letterman's Club and class treasurer.

Identifying traits: Subject enjoys sports, and is willing to have steak on his training table anytime.

He is rather shy, but may be lured out of hiding by taking advantage of his hobby of coin collecting. Once in the open, he might be found either at a movie or a dance, with girls who are not too shy. (These girls need not be ravishing beauties, just as long as he feels they are pretty. Even though this man is WANTED, he seems to have a rather good set of values.)

This man is a good guard, and any basketball coach would be rewarded by the approving cheers of his bleacher section if this man were put on a team roster.

WARNING!! This man's shyness and big brown eyes make him a charming catch for any girl. All young women are warned to be on the lookout for him.

A New "Old Glory" For Purdue Calumet

Look! Up there on the flagpole. Isn't that a new flag? That's right. The old, torn and tattered flag that had been flying over our Calumet Center is new again.

There was no touch of a magic wand that made this happen. In fact, quite the opposite is true. The flag touched the hearts of the staff and the Boilermaker here. This paper printed an article last November on the condition of the flag and openly asked just how such a battered symbol of our beliefs could be looked upon with pride.

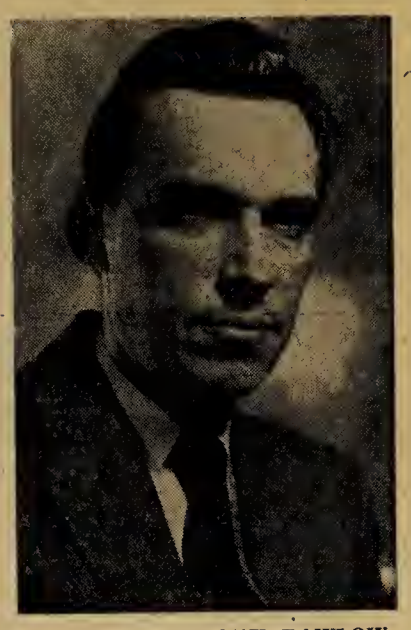
At first it seemed as though that question might go unanswered. But it did no such thing. The members of the Circle K Club offered to buy a new flag for the Center. The search for a flag was on. After some price comparing, the order for a new flag went out. On Friday, January 30, the flag was raised.

Stars 'N' Stripes

The men of the Circle K have presented Calumet Center with a new flag. Those at the presentation were (L. to R.) Wally Obara (partially hidden), Bill Diehl, Dr. W. A. Jones, Walter Pehlen, Jim Kokenis, Rich Baltrus, and

The fifteen minutes that it took to untangle the stiff ropes and raise the flag passed very quickly. Some students and faculty members watched from inside while others braved the cold outside air. Regardless of where they stood, each person had a look of satisfaction as the sharp breeze welcomed Old Glory to its place in the skies. The proudest of all were the Circle K men; they certainly had that right. Congratulations, Circle K'ers, on another job very well done.

Faculty Personalities . . .



Waterloo, Iowa, is the hometown of the John Deere Tractor Company, the Rath Blackhawk Packing Company, and Calumet Center's biology professor, **DR. KENNETH WILSON.**

Dr. Wilson's first ambition, we learned, was not in the biology field at all. After serving four years in the Marine Corps and seeing duty in the Marshall Islands, Saipan, Tinain, and Iwo Jima during the Second World War, he began studying architecture in Colorado, but in his sophomore year, he found the paramecium, the Echinodermata, and the dicotyledon more interesting than the square root of 144 or the tangent of a 45-degree angle. He decided to turn from architecture to biology and graduated from Colorado in 1949. The following year, he received his Master's Degree at the University of Wyoming. His Doctor's Degree was earned at Purdue in 1954.

After teaching for a year at the Indianapolis Center, he brought his family to the Calumet Center. That was in 1955. His family consists of his wife, Evelyn, who also graduated from Colorado with a B.A. degree in Sociology, and their two young daughters, Judy and Jennifer.

When Dr. Wilson isn't grading test papers or answering questions in the biology lab, he finds research in mycology his major interest. Mycology, by the way, is the study of fungi. Botany students, take note!

Although **ANTHONY PAWLOWSKI** is a newcomer to the Calumet Center teach staff, he is by no means a newcomer to this area. After earning a Master's Degree in chemistry at Boston College in 1954 he devoted two years to research in radiation at Notre Dame in South Bend.

Mr. Pawlowski is from North Abington, Massachustts, where he was born on November 22, 1922. He went to high school in Bridgewater, Massachusetts, and graduated from Gannon College in Erie, Pennsylvania, in 1951.

Since he just began teaching at the Calumet Center this month, housekeeping for the Pawlowski's is still rather unsettled. While waiting for his wife, Helen, and their little girl to join him, Mr. Pawlowski is living temporarily in Hammond.

Being from New England, where winter sports abound, this chemistry teacher likes to ski. He is also a golfer and has a taste for classical music.

We would like to welcome Mr. Pawlowski to Purdue and hope that he finds teaching and meeting the students a pleasant experience.

News From Campus

Dear Karen,

Sorry I haven't written sooner. Where does the time go? for a while we were about ready to swim. The river has gone down and we are back on solid ground.

Thanks for the paper. For a while I thought I was back at P.U. C.C. (memories!) It was very good, but somewhat short.

I was home last weekend for Saturday and Sunday. I saw Jim and Mr. Tinkham on the South Shore. Are many of the kids coming down for the game on the twenty-eighth?

As ever,
Charlotte

Girls To Be Featured At Circle K's Record Dance

That's right; guys, there will be an abundance of females at the Circle K Dance on Saturday, March 7. The dance will run from 8 until 12. There will be both refreshments and entertainment.

Meanwhile, back to the girls. They are all students nurses at the four area hospitals. The were invited by the Circle K Club to combat the well-known and well-felt "ratio." The hospitals invited are St. Margaret of Hammond, St. Catherine of East Chcaigo, and Methodist and Mercy Hospitals of Gary.

Now don't forget that date, March 7, from 8 'til 12 in the lounge. Prices are 50c Stag, and should you bring a girl, 75c.

QUESTION OF THE MONTH

DO YOU THINK A WOMAN COULD BE A GOOD PRESIDENT OF THE U. S.?

CARMA GREGORY

"Women such as Clare Booth Luce have proven to be successful in politics as congresswoman and ambassadress, which means if we women have advanced that much politically, we could also serve in the Presidency in a manner that satisfies the public."

FAYE KARRAS

"Capable women have the ability to fill the position, but custom in the U.S. and throughout the world would not consider a woman as influential a figure as a man."

TONY PETERS

"No. Her femininity would be doubtful—to reverse the reasoning: would a good President be a good woman?"

MR. HAYS

"Yes. Women probably wouldn't make any more mistakes than have been made already."

KAREN ROSE

"Yes. Women have proven themselves as capable as men in many capacities. I don't see why they wouldn't perform these duties as well or better than the men."

RON NUDO

"NO!! One of the main factors in my obviously onesided opinion is the woman's idea of equal rights—until something goes wrong. At this time they all resort to the wide-eyed, abused, "picked on" and humilified defense; in other words, the "protect me, I'm a woman" attitude. Besides this fact, most women are entirely too sentimental for a position that entails such responsibility. In short, if there ever is a woman president, I'll go right out and invest all my money in Russian War Bonds!" (Does this mean he won't vote for me?—Crusader Rabbit.)

PETER BAUM

"No! Women get excited too quickly, and can't stand the emotional strain of the office."

BOB WAKEFIELD

"No. Women aren't level-headed and would get excited over the least little thing."

DIANE CEMEZA

"This, as you know, is definitely a difficult question. We have had proof that women are as capable as men, but they have always been regarded as the weaker sex—not physically, but emotionally and intellectually, as far as affairs of a country are concerned. Personally, I think a woman probably could handle this job very well, but looking at the world nowadays, I'm sure other countries would look upon a country run by a woman as weak and incapable, whether this was true or not."

MRS. WILSON

"I believe the presidency is a man's job. A man will command more unity and cooperation, since most of the Congress, Cabinet, and Army members are male.

As long as women have the children in this world, they will have to spend 25 to 30 years raising them. them. By that time, it is a little late to learn enough about business and statesmanship to guide the affairs of the nation. The President needs a lot of experience in the world outside the home.

I think a woman can serve her country first by being a good wife and mother."

TINY

"No, because I can just see all of the Big Wheels from all of the foreign countries having tea and crumpets with Madame President, and laughing at her out of the other side of their mouths."

Calumet Center Favored To Win

Off-Campus Tournament

By Al Jenkins and Marcia Fandrey

Hoping to avenge a two-point loss to the Ft. Wayne Extension in the Inter-Extension Basketball Tournament last year, P.U.C.C. will send a well-balanced scoring team against a Ft. Wayne quintet following the Indianapolis-Michigan City match at the Purdue fieldhouse, Saturday morning, February 28.

Although P.U.C.C. is favorite to win its fifth championship since the tournament started in 1950, Coach "Woody" Hayes continues to remain skeptical.

According to Hayes: "If the boys play the type of basketball they are capable of playing, we'll be a lot tougher ball club than last year. The tough game will be the elimination match on Saturday morning against Ft. Wayne. They're always the team to beat, although Indianapolis will also have to be taken into consideration because they won the championship last year." Coach Hayes' boys have won 9 games and dropped 9 during the regular season which included such outstanding opponents as Lake Forest "B", Joliet J. C., and Valparaiso University freshmen.

Although there is no way to actually compare the teams competing, P.U.C.C. has played the Michigan City representative and won handily 97-58. Coach Hayes, in order to prevent any advance scouting, started his reserves and used his first team only sparingly.

This game, however, should not be used as a basis to compare the Ft. Wayne and Indianapolis quintets since Michigan City is usually weak every year.

P.U.C.C. will probably combine a fast break and rugged rebounding in an attempt to overpower their opponents.

Chuck Rayson, 6'1" forward, will lead the Boilermaker assault with a 13.1 point average per game. Teaming up with Rayson at forward will be 6'1" Bill Smith, with 6'6" Bob Tolan at center, and 5'11" Bob Wakefield and 5'8" Jerry Francoeur at the guards.

Wakefield and Tolan are averaging 12 points per game with Smith and Francoeur averaging 11.1 and 10 points respectively.

They say bench strength makes a tournament team. If that's the case, P.U.C.C. will have little to worry about. Leading reserves include 6' forward Larry Drutis who is averaging 9.0 points a game, 5'8" guard Jimmy Dedelow who is averaging 8.2 points a game, and 6'2" John Rimkunas who is averaging 7.7 points a game.

To prepare for its encounters this Saturday, Coach Hayes sent his boys against Lyons Community College last week and revenged a previous loss by trouncing them 98-78, and then defeated a very tough Joliet Junior College squad by a score of 85-64.

The question now arises: Can P.U.C.C. cast off the Ft. Wayne jinx?

Jinx? Whammy is a better term.

Last year in the morning elimination match P.U.C.C. had tied up the score 56-56 with seven seconds remaining to be played. After considerable trouble trying to get the ball in bounds, a Ft. Wayne player caught a long pass at mid-court, whirled and let loose a fifty foot shot that ripped through the net as the buzzer sounded, giving Ft. Wayne its second consecutive victory over P.U.C.C.

The year before, P.U.C.C. dropped the Championship game to Ft. Wayne by one point also in the final seconds.

Revenge will be the word, this year, as every member of the squad is in good physical and mental condition and all are out for Ft. Wayne blood.

All in all, this coming tournament promises to have many thrills to both spectators and apponents alike, and good backing by P.U.C.C. students could certainly be a stimulus to lead the team on to victory.

Tickets still available can be purchased at the cashier's office for $1.00 which are good for all games. The championship playoff will be at 6:00 Saturday evening preceding the Purdue-Minnesota game.

PUCC BASKETBALL TEAM

Coach Hayes looks dotingly at his "boys," (L. to R.) John Rimkunas, Bill Smith, "Spider" Webb, Bob "Zug" Zgunda, Larry Drutis. (Kneeling, L. to R.) Chuck Rayson, Dick Radzwill, Jimmy Dedelow, Jerry Francouer, Bob Wakefield and Bill Clark. We'll be behind these guys all the way in Lafayette, Saturday, at the Purdue Fieldhouse for the Off-campus Tourney. Good luck, fellows.

PUCC Romps To Wins Over Lyons Twp. and Joliet

With all 11 players scoring at least one field goal apiece, P.U.C.C. basketball team rolled to a 98-78 victory over Lyons Township Junior College.

Ahead by only 8 points at the half 40-32, Purdue quickly widened the gap when play resumed. Led by Larry Drutis, who got 12 points, and Charlie Rayson, who hit 4 for 4 from the field, the Boilermakers put 58 points through the hoop in the second half.

JOLIET GAME

In the final game of the regular season, the P.U.C.C. basketball team avenged an earlier defeat at the hands of Joliet Junior College. Beaten earlier in the season at Joliet by 92-48, the Boilermaker's turned in a 85-64 victory Saturday.

Off to a slow start, the P.U.C.C. was down 10-1 before hitting their first field goal. Fighting back they closed the gap to only two points 23-21. They then scored 12 points in a row to go ahead 33-23. They were never in trouble from then on, always staying in front by 6 points.

With Tolan, Drutis, and Rayson rebounding, and Wakefield and Francoeur in the back court, the team outshot, outran, outrebounded and outplayed the Joliet five. All five boys hit in double figures, with steady Bob Wakefield again top man with 23. Tolan, Rayson, Drutis and Francouer chipped in wth 19, 14, 12, 12, respectively. The entire game was a great united team victory.
